Learn to invest without risking real money

The Virtual Trading Platform (VTP) lets students and new investors build and manage portfolios with virtual cash on real market prices, and learn from their decisions without financial risk.

Users place orders, follow their positions, compare their performance and risk with a benchmark, and take part in competitions organised with universities and partners.

Why it matters

VTP is used in the CCPE courses and the professional education programme as a practical lab for portfolio management and trading discipline.

What Virtual Trading Platform offers

Virtual cash

Invest without real money

Real prices

Market data from the NXW platforms

Orders and portfolios

Buy, sell, follow positions

Analytics

Return, risk, benchmark

Competitions
